

Cleaning and Maintenance

To help maintain optimum performance and prevent overheating of the hairdryer, the rear filter should be cleaned on a regular basis.

- Ensure that the appliance is switched off, unplugged from the power outlet and has cooled down.
- Holding the handle of the appliance firmly, pull the rear filter down to remove.
- Using a soft brush, clean any hair and other debris that may build up in the filter.
- Replace the rear filter by pushing back into position.

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety instructions should always be followed, including the following:

Polythene bags over product or package may be dangerous. To avoid danger of suffocation, keep this wrapper away from babies and children. This bag is not a toy.

DANGER: Unplug unit when not in use. All appliances are electrically live even when switched off.

WARNING: This appliance must not be taken into a bathroom. 

- Do not immerse in water or other liquids. Do not use in the bath, or near basins or other vessels containing water.
- Do not reach for an appliance that has fallen into water. Unplug immediately.
- Take care to avoid contact between the hot surfaces of the unit and the skin, paying particular attention to the face, neck and hands.
- This appliance is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with the appliance.

IMPORTANT: Always unplug the appliance when not in use or before cleaning. Do not leave unattended when plugged in or switched on. Do not place on any heat-sensitive surface and always allow to cool before storing away.

- Do not use any attachments other than those supplied by Conair Australia Pty Ltd.
- Use this appliance only for its intended use as described in this instruction booklet.
- This appliance is not intended for commercial use.
- Never block the air openings of the appliance or place on a soft surface such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint and other debris.
- Attachments may get hot during use. Allow them to cool before handling.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Keep the cord away from heated surfaces.
- Do not use an extension cord with this appliance.
- Do not use this appliance if the supply cord is damaged. In the event of damage, discontinue use immediately and contact your dealer for instructions on returning it for examination or exchange.
- After use do not wrap the cord around the appliance as in time this may cause the cord to fracture. Coil cord loosely by the side of the appliance in storage.
- Never drop or insert any object into any opening
- Always ensure that the voltage to be used corresponds to the voltage marked on the unit.
- For additional protection, the installation of a residual current device (RCD) with a rated operating current not exceeding 30mA is advisable in the electrical current circuit supplying the bathroom. Ask your installer for advice.

Expert Lightweight 2000

The VS Sassoon Expert Lightweight 2000 is a lightweight hairdryer with powerful airflow for fast drying. It features 3 heat/speed settings for variable style control with ionic-conditioning technology™ to leave hair silky and shiny with reduced frizz.

With a concentrator nozzle for controlled airflow, diffuser for drying naturally curly hair and a tunnel vent brush for convenient styling, the Expert Lightweight 2000 is ideal for all types of styling.

1. 2000 watts
2. ionic generator
3. 3 heat/speed settings
4. cool shot button
5. concentrator nozzle
6. diffuser
7. hinged rear filter
8. hanging loop
9. ergonomic handle
10. tunnel vent brush

Additional features:

- Ionic Conditioning Technology™

How to use your Expert Lightweight 2000

This hairdryer features a lightweight, full power design for convenient and controlled styling.

1. Wash and condition your hair as usual.
2. Always towel-dry your hair before using the dryer.
3. Ensure the switch is set to the off ('0') setting before plugging into a suitable power outlet.
4. There are 3 heat/speed settings, plus the cool shot button.
 - a. Use the low heat/speed setting as the hair begins to dry and for styling and scrunch drying. The low heat is also best for fine or damaged hair.
 - b. Use the medium heat/speed setting for normal hair.
 - c. Use the high heat/speed setting for initial drying. The highest setting is ideal for thick or hard to style hair.
5. Use the cool shot button on warm hair to rapidly cool the hair and set the style in place for a longer-lasting effect.

The Attachments:

Concentrator Nozzle -

Use the concentrator nozzle for directing airflow just where you want it, to ease styling and straightening. For additional control use one of the lower settings and point the airflow along the surface of the hair to be dried.

CAUTION: Take care not to direct the airflow directly onto the skin (e.g. scalp, neck ears, face, etc.) as hot air from the hairdryers can, particularly if held to close, cause discomfort or even burns.

Volumising Diffuser -

Important: Only use the diffuser with your dryer on the lowest heat settings.

Use the diffuser to build life and volume in short to medium length hair, for drying naturally curly hair, scrunch with your hands and follow with the diffuser.

Tunnel Vent Brush

Tunnel Vent Brush – used in conjunction with a VS Sassoon hairdryer – helps to maximize hot airflow for faster blow-dry styling. This type of hairbrush is useful for creating volume and texture to your hair, as well as aiding in the straightening of hair (with a concentrator nozzle attached to the hairdryer).

How does the ionic feature work?

Many aspects of modern living, including air conditioning, contact with man-made fibres and air pollution add to the build-up of static electricity in the hair. Even brushing and towel-drying the hair can increase these levels. This static charge causes the scales, or cuticles of the hair, to push hair strands apart, resulting in a rough hair surface. Consequently, hair may have a dull appearance.

High levels of static charge cause hair to become 'flyaway' and difficult to style. The advanced internal ionic generator conditions hair by emitting negative ions to reduce static, by leaving hair silky and shiny with reduced frizz.

Lightweight Design

The VS Sassoon Expert Lightweight 2000 features 50% less weight than that of a standard AC motor*. This dryer provides full power, but with a lightweight design for fast and efficient styling.

* based on comparative weight of VS140A Vs VS5531A AC dryer.
