IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety instructions should always be followed, including the following:

Polythene bags over product or package may be dangerous. To avoid danger of suffocation, keep this wrapper away from babies and children. This bag is not a toy.

DANGER: Unplug unit when not in use. All appliances are electrically live even when switched off.

WARNING: This appliance must not be taken into a bathroom.

- Do not immerse in water or other liquids. Do not use in the bath, or near basins or other vessels containing water.
- Do not reach for an appliance that has fallen into water. Unplug immediately.
- Take care to avoid contact between the hot surfaces of the unit and the skin, paying particular attention to the face, neck and hands.
- This appliance is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with the appliance.

IMPORTANT: Always unplug the appliance when not in use or before cleaning. Do not leave unattended when plugged in or switched on. Do not place on any heat-sensitive surface and always allow to cool before storing away.

- Do not use any attachments other than those supplied by Conair Australia Pty Ltd.
- Use this appliance only for its intended use as described in this instruction booklet.
- This appliance is not intended for commercial use.
- Never block the air openings of the appliance or place on a soft surface such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint and other debris.
- Attachments may get hot during use. Allow them to cool before handling.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Keep the cord away from heated surfaces.
- Do not use an extension cord with this appliance.
- Do not use this appliance if the supply cord is damaged. In the event of damage, discontinue use immediately and contact your dealer for instructions on returning it for examination or exchange.
- After use do not wrap the cord around the appliance as in time this may cause the cord to fracture. Coil cord loosely by the side of the appliance in storage.
- Always ensure that the voltage to be used corresponds to the voltage marked on the unit.
- For additional protection, the installation of a residual current device (RCD) with a rated operating current not exceeding 30mA is advisable in the electrical current circuit supplying the bathroom. Ask your installer for advice.
- Never drop or insert any object into any opening.

Ion Shine 2000™ Styling Pack

VS Sassoon's Ion Shine 2000 is a powerful 2000 watt hairdryer that features heat-balancing Tourmaline-Ceramic Technology™, Ceramic Disk Technology™ with dual ionic ports and Ionic Conditioning Technology™ for static-free, superior condition and shine. With 3 heat and 2 speed settings, a cool shot button, quiet tone feature, concentrator nozzle and a free Tourmaline-Ceramic cushion brush the Ion Shine 2000™ Styling Pack is the ultimate styling tool.

- 2000 watts
- tourmaline-ceramic technology™
- ionic conditioning technology™ with dual ionic ports
- ceramic disk technology™
- 3 heat and 2 speed settings
- cool shot button
- quiet tone feature
- concentrator nozzle
- hinged rear filter
- free tourmaline ceramic cushion brush

How to use your Ion Shine 2000™ Styling Pack

This hairdryer features the latest in heat-balancing Tourmaline-Ceramic and Ionic Conditioning Technology™ leaving your hair with a frizz-free, conditioned shine.

- Always towel-dry your hair before using the dryer.
- Ensure that the switch is set to the Off setting before plugging into a suitable power outlet.
- There are 3 heat settings and 2 speed settings, plus the cool shot button. Use the high heat and speed settings for initial drying. Use the low heat and speed settings as the hair begins to dry, and for styling and scrunch drying.
- Use the cool shot button on warm hair to rapidly cool the hair and set the style in place for a longer-lasting effect.

The Concentrator Nozzle Attachment:

Use the concentrator nozzle for directing airflow just where you want it, to ease styling and straightening. For additional control, use one of the lower settings and point the airflow along the surface of the hair to be dried.

CAUTION: Take care not to direct the airflow directly onto the skin (e.g. scalp, neck, ears, face, etc.) as hot air from hairdryers can, particularly if held too close, cause discomfort or even burns.

Finger Diffuser

IMPORTANT: Only use the diffuser with your dryer on the lowest heat settings. Use the diffuser with soft fingers, which gently grip hair, to build life, volume and curls in short to medium length hair, or scrunch with your hands and follow with diffuser. Shampoo and towel dry your hair. Hang your head forward and aim the diffuser upwards so that the warm air circulates freely through your hair. When dry, toss your head back for a stunning casual look.

What is Tourmaline-Ceramic Technology™?

Tourmaline-Ceramic Technology™ delivers even heat without hot spots. Tourmaline is a semiprecious crystal which is a natural source of negative ions and far-infrared (FIR) rays. The production of negative ions from tourmaline eliminates static in the hair, and far-infrared rays assist in the deep penetration of heat, thus preventing hair damage. When in contact with wet hair, Tourmaline-Ceramic Technology™ works to ionise and alkalise moisture, and provides antibacterial and deodorant qualities.

What is Ceramic Disk Technology™?

The Ceramic Disk Technology™ will help to keep your hair healthy and shiny. It works to generate full spectrum, far-infrared heat to dry hair molecules ultra-quick from the inside out. This drying process is gentle and quick – it minimises heat damage to make hair less frizzy and more manageable.

How does the ionic feature work?

Many aspects of modern living, including air conditioning, contact with man-made fibres and air pollution, add to the buildup of static electricity in the hair. Even brushing and towel-drying the hair can increase these levels. This static charge causes the scales, or cuticle, of the hair, to push hair strands apart, resulting in a rough hair surface. Consequently, hair may have a dull appearance. High levels of static charge cause hair to become 'flyaway' and difficult to style. The internal ion generator emits a stream of negative ions that act to neutralise the static charge.

Cleaning and Maintenance

To help maintain optimum performance and prevent overheating, the rear filter should be cleaned on a regular basis.

- Ensure that the appliance is switched off, unplugged from the power outlet and has cooled down.
- Holding the handle of the appliance firmly, push the top of the hinged rear filter down and away from the appliance.
- Using a soft brush, clean any hair and other debris that may have built up in the filter.
- Replace the hinged rear filter and click into place.
