

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety instructions should always be followed, including the following:

Polythene bags over product or package may be dangerous. To avoid danger of suffocation, keep this wrapper away from babies and children. This bag is not a toy.

DANGER: When the unit is used in a bathroom, unplug it after use since the proximity of water presents a hazard even when the unit is switched off.

WARNING: Do not use this appliance in or near bathtubs, showers, basins or other vessels containing water.

- Do not immerse in water or other liquids.
- Do not reach for an appliance that has fallen into water. Unplug immediately.
- Take care to avoid contact between the hot surfaces of the unit and the skin, paying particular attention to the face, neck and hands.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure they do not play with the appliance.

IMPORTANT: Always unplug the appliance when not in use or before cleaning. Do not leave unattended when plugged in or switched on.

Do not place on any heat sensitive surface and always allow to cool before storing away.

- Do not use any attachments other than those supplied by Conair Australia Pty Ltd.
- Use this appliance only for its intended use and as described in this instruction booklet.
- This appliance is not intended for commercial use.
- Never drop or insert any object into an opening.
- Never block the air openings of the appliance or place on a soft surface such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint and other debris.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Keep the cord away from heated surfaces.
- Do not use an extension cord with this appliance.
- If the supply cord is damaged it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- After use do not wrap the cord around the appliance as in time this may cause the cord to fracture. Coil cord loosely by the side of the appliance in storage.
- Always ensure that the voltage to be used corresponds to the voltage marked on the unit.
- For additional protection, the installation of a residual current device (RCD) with a rated operating current not exceeding 30mA is advisable in the electrical circuit supplying the bathroom. Ask your installer for advice.

Big Hair Styler

The VS Sassoon Big Hair Styler combines the benefits of a hairdryer with a rotating brush in the one appliance to give you total styling control in one hand. Its unique styling action is perfect for adding gorgeous volume and shine to styles. The large ceramic barrel gives fullness and body as you style whilst the soft bristles create ultimate shine and smoothness.

1. 700 watts of styling power
2. Ionic conditioning technology with internal ionic generator
3. 50mm ceramic barrel with soft brush bristles
4. 2 heat/speed settings plus a cool setting
5. Motorised brush
6. Multi-directional switches
7. Protective brush cover included

Heat Settings

Your styler features two heat and a cool setting.

Off = "0" setting on switch

Low heat = "I" setting on switch .

High heat = "II" setting on switch

Cool setting = * setting on switch (note : brush does not rotate on this setting)

- Use the high heat setting for initial drying, and the low heat setting as the hair begins to dry and for styling.
- Use the cool setting to set the style for longer lasting results after drying and styling.

Brush rotation settings

Your styler has a two-way , rotation that can be used when styling (heat settings only) .

To make the brush head rotate press the switch marked << and >> on the styler handle. These will make the brush head rotate in a clockwise or anticlockwise direction.

The styler has 2 heat/speed settings plus cool. When the styler is set on the high heat setting the brush head will rotate faster. When the styler is set on the low heat setting the brush head will rotate slower.

Note: The brush head does not rotate when used on the cool setting.

The styler can also be used as a fixed head brush for styling .

How to use your Big Hair Styler

1. Remove all packaging and promotional labels before use.
2. Remove the protective brush cover from the brush barrel by firmly sliding upwards.
3. Plug the styler into a power outlet and select either the low or high heat settings – Depress the << or >> brush rotation buttons to ensure you understand the rotation direction before styling your hair .

4. Wash and condition your hair as usual. Comb hair before using to detangle.
5. If you have long or thick hair you may find it quicker and easier to use a hairdryer first, to rough dry your hair and remove excess moisture. For added volume , turn your head upside down as you dry.
6. Once hair is 80% dry, you should start to create your style using the Big Hair Styler.
7. Ensure you section your hair using clips before styling .
8. Take a hair section approx 2.5cm - 5cm wide to start styling with.
9. Slide the on/off temperature switch to either the low or high heat setting.
10. Place the styler under the section of hair, close to the roots and brush through the section to remove tangles (without brush rotating).
11. For added volume at the root of the hair , hold the brush in place at the root (hair section is draped over top of brush) for a few seconds.
12. Move the brush through the hair section (hair is draped over top of brush), towards the ends and as you reach the end of the hair section, start to rotate the brush away from your head by pressing and holding the appropriate rotation direction switch.
13. As you do this it is important to resist the rotation of the brush by pulling the brush downwards. The brush should be rotating through the section of your hair (without the hair becoming wound round the brush head if you are holding the styler with the correct tension against the hair) to create a brushing effect as it dries and styles the hair.

IMPORTANT! It may take several attempts to perfect this technique. If the brush spins too quickly and hair wraps around the brush head , simply release the rotation button and remove from the hair. Use the low heat setting (low brush speed) and practise rotating the brush on the lower ends of your hair until you feel comfortable with the styling action. If hair continues to wrap around the barrel you need to increase the downward tension.

It is important to section your hair before styling and style section by section to get the best results.

14. For even more volume, allow the brush to rotate, winding the entire section of the hair around the barrel, release the rotation switch and leave in the hair for a few seconds.
15. To release the section of hair , press and hold the opposite rotation button to unwind the hair section.
16. Repeat for each hair section.
17. After use switch off and unplug the appliance.
18. Allow the styler to cool before storing.
19. Place the protective brush shield over the brush head to protect the bristles.

WARNING! The ceramic brush barrel will get hot during use . Take care to avoid the hot surface of the styler coming in direct contact with the skin, in particular the eyes, ears, face and neck.

Styling tips

- For fine hair types or to gain extra volume use a volumising mousse in your hair while damp before styling.
- To define layers and give shape to styles, follow step 12 and repeat through the section.
- To add volume to the roots and body through the top section of the hair, follow steps 10 to 12 but using an upward motion.
- For long lasting results, follow steps 10 to 14 but then slide the on/off switch to the cool setting for a few seconds, this will set the hair.
- Refer to the 'how to' video on the VS Sassoon website at www.vssassoon.com.au

User Maintenance

IMPORTANT! Check and clean the styler filter on a regular basis.— To help maintain optimum performance and prevent overheating of your appliance, the rear filter should be cleaned on a regular basis.

- Ensure that the appliance is switched off, unplugged from the power outlet and has cooled down.
- Holding the handle of the appliance firmly, click open the rear filter at the base of the styler down to open.
- Using a soft brush, clean any hair and other debris that may build up in the filter.
- Replace the rear filter by pushing back into position.

Limited Two Year Warranty

To make a claim during the warranty period you must have proof of purchase receipt . We suggest that you attach you receipt to your instruction manual or warranty card for future reference.

Conair Australia Pty Ltd. will repair or replace (at our option) your appliance free of charge for twenty-four months from the date of purchase if the appliance is defective in workmanship or materials.

This warranty is an additional benefit and does not affect your legal rights. To obtain service under this warranty, please fill in and return the Warranty Registration as instructed.
