  - Comb through to ensure your hair is completely tangle free.
  - Divide your hair into 4 sections (2 back and 2 front).
  - At the front make your parting the top of sections.
  - Starting at the nape of the back sections, take a horizontal section no wider than the plate of your straightener.
  - Insert the straightener at the base near the scalp taking care not to touch the scalp.
  - Clamp the plates over the section of hair and slide down slowly and evenly.
  - Repeat this through all your sections.
  - Finish with a few drops or serum rubbed through the palms of your hair and stroke over the surface to control any fly aways.
- NOTE:** This is a mini product. It is recommended to adjust the size of the sections to the size of the styler.
- TIP:** Thinner sections will give you the best results. If you need to go over a section again to get straight results you need to use thinner sections.

## STYLE TIPS

### STRAIGHTEN

// For the best results, start with clean, dry & thoroughly combed through hair. Straighten your hair in sections making sure you go over each section once only to get a gorgeous, silky finish. Apply a heat spray for extra protection & longer lasting results.

### VOLUME

// Straight hair doesn't have to be poker straight. Create volume by making a curved movement with your wrist as you glide the straighteners down the hair length.

### SHORTER STYLES

// Straight hair isn't just for long styles. Create a classic glossy bob by using this straightener on your shorter cut.
