

## IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety instructions should always be followed, including the following:

Polythene bags over product or package may be dangerous. To avoid danger of suffocation, keep this wrapper away from babies and children. This bag is not a toy.

### DANGER:

When the unit is used in a bathroom, unplug it after use since the proximity of water presents a hazard even when the unit is switched off.

**WARNING:** Do not use this appliance in or near bathtubs, showers, basins or other vessels containing water.

- Do not immerse in water or other liquids.
- Do not reach for an appliance that has fallen into water. Unplug immediately.
- Take care to avoid contact between the hot surfaces of the unit and the skin, paying particular attention to the face, neck and hands.
- This appliance is not intended for use by infirm persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.

**IMPORTANT:** Always unplug the appliance when not in use or before cleaning. Do not leave unattended when plugged in or switched on. Do not place on any heat-sensitive surface and always allow to cool before storing away.

- Do not use any attachments other than those supplied by Conair Australia Pty Ltd.
  - Use this appliance only for its intended use as described within this instruction booklet.
  - This appliance is not intended for commercial use.
  - Never drop or insert any object into an opening.
  - Never block the air openings of the appliance or place on a soft surface such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint and other debris.
  - Attachments may get hot during use. Allow them to cool before handling.
  - Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
  - Keep the cord away from heated surfaces.
  - Do not use an extension cord with this appliance.
  - If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
  - After use do not wrap the cord around the appliance as in time this may cause the cord to fracture. Coil cord loosely by the side of the appliance in storage.
  - Always ensure that the voltage to be used corresponds to the voltage marked on the unit.
  - For additional protection, the installation of a residual current device (RCD) with a rated operating current not exceeding 30mA is advisable in the electrical current circuit supplying the bathroom.
- Ask your installer for advice.

## Eco Expert Dryer

VS Sassoon's Eco Expert Dryer has the latest energy saving technology with a powerful 2100 watts of fast drying power for only 1800 watts of energy consumption. It features 3 heat and 2 speed settings for styling control with ionic conditioning technology™ and ceramic technology™ for silky and shiny hair with reduced frizz. With a slim 10mm concentrator nozzle for controlled airflow and diffuser for drying naturally curly hair, the Eco Expert is truly a professional dryer.

### Features:

1. 2100 watts drying performance
2. Ionic Conditioning Technology™
3. Ceramic technology™
4. 3 heat and 2 speed settings
5. Turbo and cool shot button
6. Slimline concentrator
7. Volumising diffuser
8. Removable rear filter

### How to use your Eco Expert Dryer

This dryer features a powerful 2100W drying performance for ultra fast airflow to dry the hair quickly, minimising heat damage.

1. Wash and condition your hair as usual.
2. Always towel-dry your hair before using the dryer.
3. Ensure the switch is set to the off ('0') setting before plugging into a suitable power outlet.
4. There are 3 heat and 2 speed settings, plus the turbo and cool shot button.
  - a. Use the low heat/speed setting as the hair begins to dry and for styling and scrunch drying. The low heat is also best for fine or damaged hair.
  - b. Use the medium heat/speed setting for normal hair.
  - c. Use the high heat setting for thick, hard to dry hair.
  - d. Use the Turbo button to speed up drying thanks to 2100W of drying performance. Ideal for thick, hard to dry hair.
5. Use the cool shot button on warm hair to rapidly cool the hair and set the style in place for a longer-lasting effect.

### The Attachments:

#### Ultra-slim Concentrator

Use the concentrator nozzle for directing airflow just where you want it, to ease styling and straightening. For additional control use one of the lower settings and point the airflow along the surface of the hair to be

dried.

**CAUTION:** Take care not to direct the airflow directly onto the skin (e.g. scalp, neck ears, face, etc.) as hot air from the hairdryers can, particularly if held to close, cause discomfort or even burns.

#### Volumising Diffuser

**Important:** Only use the diffuser with your dryer on the lowest heat settings.

Use the diffuser to build life, volume and curls in short to medium length hair, or scrunch with your hands and follow with diffuser. Shampoo and towel dry your hair. Hang your head forward and aim the diffuser upwards so that the warm air circulates freely through your hair. When dry, toss your head back for a stunning casual look.

### How does the ionic feature work?

Many aspects of modern living, including air conditioning, contact with man-made fibres and air pollution add to the build-up of static electricity in the hair. Even brushing and towel-drying the hair can increase these levels. This static charge causes the scales, or cuticles of the hair, to push hair strands apart, resulting in a rough hair surface. Consequently, hair may have a dull appearance.

High levels of static charge cause hair to become 'flyaway' and difficult to style. The advanced internal ionic generator conditions hair by emitting negative ions to reduce static, by leaving hair silky and shiny with reduced frizz.

### What is Ceramic technology™?

Ceramic technology™ delivers even heat distribution, helping to reduce harmful and damaging hotspots. Ceramic helps to retain heat longer and provides quicker results than non-ceramic styling tools.

#### Cleaning and Maintenance

To help maintain optimum performance and prevent overheating of the hairdryer, the rear filter should be cleaned on a regular basis.

- Ensure that the appliance is switched off, unplugged from the power outlet and has cooled down.
- Holding the handle of the appliance firmly, use the other hand to remove the filter.
- Using a soft brush, clean any hair and other debris that may build up in the filter.
- Replace the rear filter by pushing back into position.

#### Limited Two-Year Warranty

This product is subject to the express warranty given on the warranty card included with the product, as may be amended by reference to and in accordance with the terms of the warranty cards displayed on VS Sassoon website [www.vssassoon.com.au](http://www.vssassoon.com.au)

To make a warranty claim you must retain your proof of purchase. Further details can be found at [www.vssassoon.com.au](http://www.vssassoon.com.au) and click on 'customer service'.
