STYLE INSTRUCTIONS

 - Apply a mousse, heat spray or smooth styling product for the best results.
 - Comb through to ensure your hair is completely tangle free.
 - Divide your hair into 4 sections (2 back and 2 front).
 - At the front make your parting the top of sections.
 - Starting at the nape of the back sections, take a horizontal section no wider than the plate of your straightener.
 - Insert the straightener at the base near the scalp taking care not to touch the scalp.
 - Clamp the plates over the section of hair and slide down slowly and evenly.
 - Repeat this through all your sections.
 - Finish with a few drops or serum rubbed through the palms of your hair and stroke over the surface to control any fly ways.
- TIP:** Thinner sections will give you the best results. If you need to go over a section again to get straight results you need to use thinner sections.

STYLE TIPS

STRAIGHTEN

// For the best results, start with clean, dry & thoroughly combed through hair. Straighten your hair in sections making sure you go over each section once only to get a gorgeous, silky finish. Apply a heat spray for extra protection & longer lasting results.

VOLUME

// Straight hair doesn't have to be poker straight. Create volume by making a curved movement with your wrist as you glide the straighteners down the hair length.

SHORTER STYLES

// Straight hair isn't just for long styles. Create a classic glossy bob by using this straightener on your shorter cut.
